

- **Establish a routine and schedule for homework (a specific time and place)** and adhere to the schedule as closely as possible. Don't allow your child to wait until the evening to get started.
- **Limit distractions** in the home during homework hours (eg, reduce unnecessary noise, activity, and phone calls; turn off the TV).
- **Assist your child in dividing assignments into smaller parts** or segments that are more manageable and less overwhelming.
- **Assist your child in getting started on assignments** (eg, read the directions together, do the first items together, observe as your child does the next problem/item on his or her own). Then get up and leave.
- **Monitor and give feedback without doing all the work together.** You want your child to attempt as much as possible independently.
- **Praise and compliment your child when he or she puts forth good effort and completes tasks.** In a supportive, noncritical manner it is appropriate and helpful to assist in pointing out and making some corrections of errors on the homework.
- **It is not your responsibility to correct all of your child's errors on homework** or make him or her complete and turn in a perfect paper.
- **Remind your child to do homework and offer incentives:** "When you finish your homework, you can..."
- **A contract for a larger incentive/reinforcer may be worked out** as part of a plan to motivate your child to persist and follow through with homework. ("If you have no missing or late homework assignments this next week, you will earn...").
- **Let the teacher know your child's frustration and tolerance level in the evening.** The teacher needs to be aware of the amount of time it takes your child to complete tasks and what efforts you are making to help at home.
- **Help your child study for tests.** Study together. Quiz your child in a variety of formats.
- **If your child struggles with reading, help by reading the material together** or reading it to your son or daughter.
- **Work a certain amount of time and then stop working on homework.** Don't force your child to spend an excessive and inappropriate amount of time on homework. If you feel your child worked enough for one night, write a note to the teacher attached to the homework.
- It is very common for students with ADHD to fail to turn in their finished work. It is very frustrating to know your child struggled to do the work, but then never gets credit for having done it. Papers seem to mysteriously vanish off the face of the earth! **Supervise to make sure that completed work leaves the home and is in the notebook/backpack.** You may want to arrange with the teacher a system for collecting the work immediately on arrival at school.
- Many parents find it very difficult to help their own child with schoolwork. Find someone who can. **Consider hiring a tutor!** Often a junior or senior high school student is ideal, depending on the needs and age of your child.
- **Make sure your child has the phone number of a study buddy**—at least one responsible classmate to call for clarification of homework assignments.
- Parents, **the biggest struggle is keeping on top of those dreaded long-range homework assignments** (eg, reports, projects). This is something you will need to be vigilant about. Ask for a copy of the project requirements. Post the list at home and go over it together with your child. Write the due date on a master calendar. Then plan how to break down the project into manageable parts, scheduling steps along the way. Get started AT ONCE with going to the library, gathering resources, beginning the reading, and so forth.

Why Is My Child Having Trouble in School?

It is very common for children with ADHD to have difficulties in school. These problems can occur for several reasons:

- Symptoms of ADHD like **distractibility and hyperactivity** make it hard for children with ADHD to pay attention or stay focused on their work, even though they may be capable learners and bright enough to understand the material.
- Many children with ADHD also have **trouble organizing** themselves, breaking an assignment down into smaller steps, and staying on a schedule.
- Some children with ADHD have **difficulty with self-control** and get into trouble with peers and/or teachers.
- Many children with ADHD also have **a learning disability**. Schools usually define a learning disability as a discrepancy between a child's IQ score and his or her performance on achievement tests. A child with a learning disability has difficulty understanding information he or she sees or hears OR trouble putting together information from different parts of the brain.
- Children with ADHD often **can learn material but it may take longer** and require more repetition.
- Children with ADHD often show **inconsistency in their work** because of their ADHD; one day they may know information and the next day they cannot seem to remember it.

Typical School Performance Difficulties Associated With ADHD

- Poor organization and study skills
- Weaknesses in written language/writing skills
- Minimal/inconsistent production and output (both in-class assignments and homework)
- Behavior that interferes with learning and impacts on interpersonal relationships
- Immature social skills

What Can I Personally Do to Help?

There are many different ways that a parent's participation can make a difference in a child's school experience, including:

- **Spending time** in the classroom, if your work schedule allows, and observing your child's behavior.
- **Talking with your child's teacher** to identify where your child is having the most problems.
- Working with your child's teacher to make a **plan** for how you will address these problems and what strategies at school and home will help your child be successful at learning and completing work.
- **Acknowledging the extra efforts your child's teacher** may have to make to help your child.

- **Reading all you can about ADHD** and sharing it with your child's teacher and other school officials.
- **Becoming an expert on ADHD and your child.**
- **Finding out about tutoring options** through your child's school or local community groups. Children with ADHD may take longer to learn material compared with other children even though they are just as smart. Tutoring may help your child master new materials.
- **Making sure your child actually has mastered** new material presented so that he or she does not get behind academically.
- **Acknowledging how much harder** it is for your child to get organized, stay on task, complete assignments, and learn material compared with other children. Help your child to get organized, break tasks down into smaller pieces, and expend his or her excess physical energy in ways that are "okay" at home and in the classroom.
- **Praising your child** and rewarding him or her for a job well done immediately after completing tasks or homework.
- **Joining a support group** for parents of children with ADHD or learning disabilities. Other parents may help you with ideas to help your child.

Another good way to get help from your school is to **determine if your school has a regular education process that helps teachers with students who are having learning or behavioral problems that the teacher has been unsuccessful in solving**. The process differs in various school districts and even among different schools in the same district. Some of the names this process may go by include Student Study Team (SST), Instructional Support Team (IST), Pupil Assistance Team (PAT), Student Intervention Team (SIT), or Teacher Assistance Team (TAT).

Parents are encouraged to request a meeting on their child to discuss concerns and create a plan of action to address their child's needs. In addition to the child's teacher, members of the team may include the child, the parents, a mentor teacher or other teachers, the principal, the school nurse, the resource specialist, a speech and language specialist, or a counselor or psychologist. The team members meet to discuss the child's strengths and weaknesses, the child's progress in his or her current placement, and the kinds of problems the child is having. The team members "brainstorm" to develop a plan of action that documents the kinds of interventions that will help the child, the timeline for the changes to take place, and the school staff responsible for the implementation of the team's recommendations.

The team should also come up with a plan to monitor the child's progress. A follow-up meeting should be scheduled within a reasonable time frame (usually 4 to 6 weeks) to determine whether the team's interventions are actually helping the child in the areas of difficulty.
